SYNTHETIC METALS

www.elsevier.com/locate/synmet

Subject Index of Volume 107

Adjustable electroluminescence
Adjustable electroluminescence: blue-green to red organic light-emitting diodes based on novel poly-non-conjugated oligomers, 85
All-solid-state photoelectrochemical cell
All-solid-state photoelectrochemical energy conversion with the conjugated polymer poly[3-(4-octylphenyl)-2,2′-bithiophene], 97
Al/PPHT/ITO
Photocarriers generation process and photovoltaic effect in PPHT thin film Schottky barrier devices, 197
Amine
X-ray diffraction studies, electrical and optical properties of some metal complexes of the ligand including 1-amino-3-(*N*-benzylamino) propane, 191
Anisotropic photoconductivity
Steady-state photoconductivity of a supramolecular assembly of nonlinear optical molecules showing evidence of rectifier properties, 183

BBL
Correlation of electron spin concentration and conductivity in the ladder polymer BBL as a function of electrochemical potential, 39
Bimetallic salt
Solid state electrical conductance properties of some new bimetallic salts and heterometallic coordination polymers derived from bis (1-ethoxycarbonyl-1-cyanoethylene-2,2-dithiolato) cuprate(II) ion, 167
Blue luminescent polymer
Efficient, blue light-emitting diodes using cross-linked layers of polymeric arylamine and fluorene, 129
Improved efficiencies of light-emitting diodes through incorporation of charge transporting components in tri-block polymers, 203

Carrier transport
Carrier transport in thin films of organic electroluminescent materials, 107
Catalysis
Electrocatalysis at conducting polymers, 75
Chain extender
Polyurethane-based conducting polymer blends. I. Effect of chain extender, 65
Complex
X-ray diffraction studies, electrical and optical properties of some metal complexes of the ligand including 1-amino-3-(*N*-benzylamino) propane, 191
Conducting polymers
Electrocatalysis at conducting polymers, 75
Conductivity
Syntheses and properties of π-conjugated polymers containing tetrathiafulvalene in the polymer backbone, 19
Correlation of electron spin concentration and conductivity in the ladder polymer BBL as a function of electrochemical potential, 39
π-Conjugated polymer
Syntheses and properties of π-conjugated polymers containing tetrathiafulvalene in the polymer backbone, 19
π-Conjugated polymers containing thiophene-1,1-dioxide-2,5-diyl unit in the main chain, 137
Crystal structure
New organic conductor $(EDOEDT)_4Hg_3Br_8$ comprising cation layers of α''- and $\kappa(4\times4)$-types, 123
Cyclazines
A novel approach to incorporate fused heteroaromatic chromophores into polythiophenes, 93
Cyclic voltammetry
Studies on polyaniline in methane sulphonic acid (MeSA), 57
The electrochemical behavior of $(C_{70})_2$-*p*-*tert*-butylcalix[6]arene complex film, 175

Electrical conductivity
Synthesis and electrical properties of poly(μ-1,4-diisocyanobenzene) octacyanophthalocyaninatoiron(II), 27
Electroactivity
Liquid polysulfide rubber as a new dopant of polypyrrole, 35
Electrocatalysis
Electrocatalysis at conducting polymers, 75
Electrochemical behavior
Electrochemical behavior of mild steel coated by polyaniline doped with organic sulfonic acids, 111
Electrochemical polymerization
A novel approach to incorporate fused heteroaromatic chromophores into polythiophenes, 93
The electrochemical polymerization of methylene blue and properties of polymethylene blue, 159
Electrochemical properties
The electrochemical polymerization of methylene blue and properties of polymethylene blue, 159
Electrochromism
Syntheses and properties of π-conjugated polymers containing tetrathiafulvalene in the polymer backbone, 19
Electroluminescence
Reliability comparison of BTEL and bilayer organic LEDs, 53
Adjustable electroluminescence: blue-green to red organic light-emitting diodes based on novel poly-non-conjugated oligomers, 85
Electron spin resonance
Correlation of electron spin concentration and conductivity in the ladder polymer BBL as a function of electrochemical potential, 39
Electron transport
Improved efficiencies of light-emitting diodes through incorporation of charge transporting components in tri-block polymers, 203
Electron transporting material
Efficient, blue light-emitting diodes using cross-linked layers of polymeric arylamine and fluorene, 129

Elsevier Science S.A.
PII: S0379-6779(99)00264-7

EPR spectra
Solid state electrical conductance properties of some new bimetallic salts and heterometallic coordination polymers derived from bis (1-ethoxycarbonyl-1-cyanoethylene-2,2-dithiolato) cuprate(II) ion, 167
ESR–UV–vis spectroelectrochemistry
The redox mechanism of polyaniline studied by simultaneous ESR–UV–vis spectroelectrochemistry, 143
4,5-Ethylenedioxy-4′,5′-ethylenedithiotetrathiafulvalene
New organic conductor $(EDOEDT)_4Hg_3Br_8$ comprising cation layers of α″- and κ(4 × 4)-types, 123

Fibers
Conductive fibers from enzymatically synthesized polyaniline, 117
Film
The electrochemical behavior of $(C_{70})_2$-*p*-*tert*-butylcalix[6]arene complex film, 175
FT-IR spectroscopic
Liquid polysulfide rubber as a new dopant of polypyrrole, 35

Heterobimetallic coordination polymers
Solid state electrical conductance properties of some new bimetallic salts and heterometallic coordination polymers derived from bis (1-ethoxycarbonyl-1-cyanoethylene-2,2-dithiolato) cuprate(II) ion, 167
Hole transport
Improved efficiencies of light-emitting diodes through incorporation of charge transporting components in tri-block polymers, 203
Hole transporting polymer
Efficient, blue light-emitting diodes using cross-linked layers of polymeric arylamine and fluorene, 129

Indolizines
A novel approach to incorporate fused heteroaromatic chromophores into polythiophenes, 93
In/PPHT/ITO
Photocarriers generation process and photovoltaic effect in PPHT thin film Schottky barrier devices, 197
IR-spectra
Polyurethane-based conducting polymer blends. I. Effect of chain extender, 65

Ladder polymer
Correlation of electron spin concentration and conductivity in the ladder polymer BBL as a function of electrochemical potential, 39
Light emission
Reliability comparison of BTEL and bilayer organic LEDs, 53
Liquid polysulfide rubber
Liquid polysulfide rubber as a new dopant of polypyrrole, 35

Mechanical analysis
Conductive fibers from enzymatically synthesized polyaniline, 117
Methane sulphonic acid
Studies on polyaniline in methane sulphonic acid (MeSA), 57
Methylene blue
The electrochemical polymerization of methylene blue and properties of polymethylene blue, 159
Molecular devices
Nano-scale protonic rectifier, 1
Molecular electronics
Nano-scale protonic rectifier, 1
Molecular rectifier
Steady-state photoconductivity of a supramolecular assembly of nonlinear optical molecules showing evidence of rectifier properties, 183

N-substituted carbazoles
Chemical and electrochemical polymerisation of pyrrole in the presence of *N*-substituted carbazoles, 7

oPV
Syntheses and optical properties of poly(*o*-phenylene vinylene)s, 47
Organic conductor
New organic conductor $(EDOEDT)_4Hg_3Br_8$ comprising cation layers of α″- and κ(4 × 4)-types, 123
Organic electroluminescent material
Carrier transport in thin films of organic electroluminescent materials, 107
Organic light-emitting device
Reliability comparison of BTEL and bilayer organic LEDs, 53
Organic light-emitting diode
Reliability comparison of BTEL and bilayer organic LEDs, 53
Organic light-emitting diodes
Adjustable electroluminescence: blue-green to red organic light-emitting diodes based on novel poly-non-conjugated oligomers, 85
Organic sulfonic acids
Electrochemical behavior of mild steel coated by polyaniline doped with organic sulfonic acids, 111

Perhydrotriphenlene inclusion compounds
Steady-state photoconductivity of a supramolecular assembly of nonlinear optical molecules showing evidence of rectifier properties, 183
Photoluminescence
Syntheses and optical properties of poly(*o*-phenylene vinylene)s, 47
Adjustable electroluminescence: blue-green to red organic light-emitting diodes based on novel poly-non-conjugated oligomers, 85
Phthalocyanine polymer
Synthesis and electrical properties of poly(μ-1,4-diisocyanobenzene) octacyanophthalocyaninatoiron(II), 27
Polar organic crystals
Steady-state photoconductivity of a supramolecular assembly of nonlinear optical molecules showing evidence of rectifier properties, 183
Polyaniline
Studies on polyaniline in methane sulphonic acid (MeSA), 57
Electrocatalysis at conducting polymers, 75
Electrochemical behavior of mild steel coated by polyaniline doped with organic sulfonic acids, 111
Conductive fibers from enzymatically synthesized polyaniline, 117
The redox mechanism of polyaniline studied by simultaneous ESR–UV–vis spectroelectrochemistry, 143
Poly(aryleneethynylene)
π-Conjugated polymers containing thiophene-1,1-dioxide-2,5-diyl unit in the main chain, 137
Polymerisation
Chemical and electrochemical polymerisation of pyrrole in the presence of *N*-substituted carbazoles, 7
Polymer light-emitting diode
Efficient, blue light-emitting diodes using cross-linked layers of polymeric arylamine and fluorene, 129
Improved efficiencies of light-emitting diodes through incorporation of charge transporting components in tri-block polymers, 203
Polymethylene blue
The electrochemical polymerization of methylene blue and properties of polymethylene blue, 159
Poly-non-conjugated oligomers
Adjustable electroluminescence: blue-green to red organic light-emitting diodes based on novel poly-non-conjugated oligomers, 85
Poly[3-(4-octylphenyl)-2,2′-bithiophene]
All-solid-state photoelectrochemical energy conversion with the conjugated polymer poly[3-(4-octylphenyl)-2,2′-bithiophene], 97

Poly[oxymethylene-oligo(oxyethylene)]
All-solid-state photoelectrochemical energy conversion with the conjugated polymer poly[3-(4-octylphenyl)-2,2′-bithiophene], 97
Polypyrrole
Electrocatalysis at conducting polymers, 75
Polypyrrole/polysulfide
Liquid polysulfide rubber as a new dopant of polypyrrole, 35
Polythiophenes
A novel approach to incorporate fused heteroaromatic chromophores into polythiophenes, 93
Polyurethane
Polyurethane-based conducting polymer blends. I. Effect of chain extender, 65
PPV
Syntheses and optical properties of poly(*o*-phenylene vinylene)s, 47
Processibility
Studies on polyaniline in methane sulphonic acid (MeSA), 57
Protonation
Studies on polyaniline in methane sulphonic acid (MeSA), 57
Protonic rectifier
Nano-scale protonic rectifier, 1
$(C_{70})_2$-*p-tert*-butylcalix[6]arene
The electrochemical behavior of $(C_{70})_2$-*p-tert*-butylcalix[6]arene complex film, 175
Pyrrole
Chemical and electrochemical polymerisation of pyrrole in the presence of *N*-substituted carbazoles, 7

Radical cation salt
New organic conductor $(EDOEDT)_4Hg_3Br_8$ comprising cation layers of α''- and $\kappa(4 \times 4)$-types, 123
Raman spectra
The electrochemical polymerization of methylene blue and properties of polymethylene blue, 159
Redox hopping
Correlation of electron spin concentration and conductivity in the ladder polymer BBL as a function of electrochemical potential, 39
Redox mechanism
The redox mechanism of polyaniline studied by simultaneous ESR–UV–vis spectroelectrochemistry, 143
Reliability
Reliability comparison of BTEL and bilayer organic LEDs, 53

Schottky barrier
Photocarriers generation process and photovoltaic effect in PPHT thin film Schottky barrier devices, 197
Semiconductor
X-ray diffraction studies, electrical and optical properties of some metal complexes of the ligand including 1-amino-3-(*N*-benzylamino) propane, 191
Solar energy conversion
All-solid-state photoelectrochemical energy conversion with the conjugated polymer poly[3-(4-octylphenyl)-2,2′-bithiophene], 97
Solid state conductivity
Solid state electrical conductance properties of some new bimetallic salts and heterometallic coordination polymers derived from bis (1-ethoxycarbonyl-1-cyanoethylene-2,2-dithiolato) cuprate(II) ion, 167
Solution processing
Conductive fibers from enzymatically synthesized polyaniline, 117
Substituted phthalocyanine
Synthesis and electrical properties of poly(μ-1,4-diisocyanobenzene) octacyanophthalocyaninatoiron(II), 27
Supramolecular complex
The electrochemical behavior of $(C_{70})_2$-*p-tert*-butylcalix[6]arene complex film, 175
Supramolecular materials
Steady-state photoconductivity of a supramolecular assembly of nonlinear optical molecules showing evidence of rectifier properties, 183

Tetrathiafulvalene
Syntheses and properties of π-conjugated polymers containing tetrathiafulvalene in the polymer backbone, 19
Thermal analysis
Conductive fibers from enzymatically synthesized polyaniline, 117
Thermal cross-linking
Efficient, blue light-emitting diodes using cross-linked layers of polymeric arylamine and fluorene, 129
Thin film
Carrier transport in thin films of organic electroluminescent materials, 107
Thiophene-1,1-dioxide
π-Conjugated polymers containing thiophene-1,1-dioxide-2,5-diyl unit in the main chain, 137

UV–Visible spectra
The electrochemical polymerization of methylene blue and properties of polymethylene blue, 159

XRD
X-ray diffraction studies, electrical and optical properties of some metal complexes of the ligand including 1-amino-3-(*N*-benzylamino) propane, 191
X-Ray diffraction
Conductive fibers from enzymatically synthesized polyaniline, 117
